## PROJECTS

### **HikeLocal:**

[Demo](#) | [Github](#)

This application will give users a list of hiking trails in their area based on a set of criteria.

- Worked in the front end part of the team to create the design and layout of the application
- Tools used: HTML, CSS, Bulma, JavaScript, Google Maps API, Hiking Project Data API

### **Pandammit:**

[Demo](#) | [Github](#)

Pan-Dammit is centered around providing support for all! Explore movies and discover what other users are searching. Share ideas in our community blog and explore mental health resources.

- Worked with a bigger team of 6; part of the front end within the group. Mapped layout and design through Figma, discussed color schemes and what font to use
- Designed and code welcome page and movie page
- Tools used: HTML, CSS, Bootstrap, JavaScript, jQuery, APIs, Node + Express, MySQL + Sequelize, Heroku
